Hi Margarita,

Trying to get to all of my emails from the end of last week.

Yes. There is only one action for aldicarb, at this time, for a %CT. The other one discussed in the email below must belong to someone else/different chemical.

Thanks.
Debra

Subject: aldicarb

Hi Debra,

I was hoping you could help me confirm how many recent aldicarb actions have been sent to BEAD. I inherited BEAD's tracking spreadsheet for all RD actions and am trying to clean up some loose ends. What I have is that a benefits analysis for new ai on citrus was completed in 3/24/20 by Murphey Coy but not signed per RD and OGC request until decision document is vetted. Then I have two entries which I think are for the same action New use on citrus for PCT date rec'd 8/23/19; PRIA 7/15/20 and not sure about LS. Can you please confirm that there is only one outstanding aldicarb action (continuation of meeting we had several weeks ago where BEAD proposed a production cap)

Thanks
margarita
